Transportation

- Shortcuts around campus
- Filter locations based on your schedule
- Creating our own map or using an external google map
- Being able to find all the short cuts and grab an accurate time accounting for stops, traffic, or construction.
- track user location to help map out unknown shortcuts

Gym

- Live Strom Thurmond counter to see how busy it is
- Times of different locations (BLAT SPECIFICALLY)
- Amount of people in gym or occupancy level or business

Dining halls

- how long the lines are at each dining hall.
- Filter restaurants based on how much you are looking to spend
- Dining Hall filters for dietary needs(allergies, etc.)

Marketing

- Tutorials on how to use the app
- Promote and advertise the app on TikTok and other social medias.
- Talk about the app on campus and try and recruit ambassadors

Accessibility

- A place for Orgs to post when and where they will have stands or meetings on a group board.
- The ability to filter where you are looking for, like if you are looking for gym a gym pops up vs dining halls vs school buildings

Social

- Students can update events that are going on around campus
- a way to see all the events around campus live (poster shop, club/intramurals
- School could give info on events around campus to keep students active especially first gen students who are confused
- Have other users be able to make live updates to what's open

How app will be used/ on what platform

- Appeal to college students, should be a resource to help and not confuse more
- Should be an app not a web page so it can be accessed with ease on a phone
- Need an app that is easy to use and not confusing for the user since they are looking for an easy explanation for things they dont know how to do or understand
- Android is free to upload apps but apple is not how would that be accounted for?

Problems/Issues Addressed

- Accounting for handicap or people with disabilities while trying to navigate.
- Accounting the speed at which different people walk
- Where would the mapping information be stored?
- How can it be updated with construction or new routes being discovered
- If we include dining halls do we need to include meal options and types of food as well?

Images/Videos/Photos

- live feed of fields around campus. ROTC and marching band use two different fields throughout the day. knowing this is helpful for people who work out
- Building maps so you can see where your class is
- Labeling places within the map would it account for school buildings, dining halls , places to hangout, parks, gyms, etc.
